MOHAMED MAHMOUD MOHAMED ELBEEK

Backend Developer | NestJS · TypeScript · Node.js · PostgreSQL

Cairo, Egypt | +20 127 175 9984 | mohamed.elbeek88@gmail.com | linkedin.com/in/mohamed-elbeek-9b81a230b | github.com/mohamedelbeek55

SUMMARY

Backend-focused developer with full-stack exposure, graduating June 2026 with a B.Sc. in Information Technology. Builds backend systems primarily with Node.js, NestJS, Express.js, TypeScript, PostgreSQL, and MongoDB, including a deployed full-stack e-commerce application (Angular, NestJS, Prisma, PostgreSQL, Stripe, Docker, CI) and a 48+ endpoint graduation-project API. Experienced with REST API design, authentication, RBAC, automated testing, and clean architecture. Seeking a Backend or Full-Stack role where backend engineering is the primary focus.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, C#, C++, Python

Backend: NestJS, Node.js, Express.js, REST APIs, JWT Auth, RBAC, Clean Architecture, Repository Pattern, Zod

Databases: PostgreSQL, MongoDB, MySQL, SQL Server, Prisma ORM, Mongoose

Frontend: Angular, JavaScript, HTML5, CSS3

Integrations: Stripe (PaymentIntents, Webhooks, Idempotency), Google OAuth, Cloudinary, Nodemailer

DevOps & Testing: Docker, Docker Compose, GitHub Actions (CI), Railway, Jest, Supertest, Swagger / OpenAPI 3

Tools: Git & GitHub (feature-branch / PR workflow), Postman, VS Code

PROJECTS

E-Commerce Platform — Full-Stack Web Application

Angular, NestJS, TypeScript, PostgreSQL, Prisma, Stripe, Docker

Live Demo | *Swagger API Docs* | *Backend Repo*

- **Architecture:** Clean Architecture (controllers → services → repository interfaces → Prisma implementations), keeping business logic unit-testable.
- **Auth & Security:** JWT access/refresh token rotation (SHA-256 hashed), RBAC, Google OAuth, email verification, password reset with expiring single-use tokens, and rate limiting.
- **Orders & Payments:** Transactional checkout with atomic, conditional stock updates preventing overselling under concurrent requests; Stripe PaymentIntents with idempotency keys and signature-verified webhooks, duplicate events ignored.
- **Full-Stack Delivery:** Angular frontend (product/category browsing, cart, checkout, admin dashboard) consuming a NestJS/Prisma backend; both deployed and connected end to end.
- **Quality & Deployment:** Jest/Supertest tests against PostgreSQL; GitHub Actions CI (lint, tests, build, Docker); Swagger/OpenAPI 3; deployed on Railway (backend) and Vercel (frontend) with Prisma migrations.

LexaGuide Backend — Graduation Project (A+)

Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary, Zod

Live Demo | *Backend Repo* | *Frontend Repo*

- Designed and built 48+ REST endpoints across 9 modules (auth, lawyers, consultations, legal templates, document generation, file uploads, chatbot) for a legal-assistance platform.
- Implemented role-based JWT authentication (User/Lawyer/Admin) with access/refresh token rotation, session revocation, Google OAuth sign-in, and OTP-based email verification and password reset.
- Built a consultation lifecycle (pending → accepted → completed), an in-app chat API, and an admin dashboard; Mongoose data models, Zod validation, Cloudinary uploads, deployed serverless on Vercel.

Minimal Be Creative — Client Website

HTML5, CSS3, JavaScript (ES6), Swiper, AOS

Live Demo

Tech E-Commerce Web Application

ASP.NET MVC, C#, SQL Server

- Built an MVC web app for tech products with database-backed CRUD, SQL Server integration, and authentication.

EDUCATION & TRAINING

B.Sc. in Information Technology, Sinai University — Graduated: June 2026 | GPA: 3.09/4.0 (Very Good)

Relevant coursework: ASP.NET MVC with C#, Object-Oriented Programming, Database Systems, JavaScript, Python, C++.

Languages: Arabic (Native), English (Good)

Backend Node.js training (Express, MongoDB, JWT) • ITI Advanced Front-End Development with Angular (1 month)
